(c) The Commission vide order dated 21.7.2011, in Petition No 336/TT/2010 had approved tariff for single asset (i.e. Asset A1 in the instant petition) w.e.f. COD 1.11.2010 to 31.3 .2014 by restricting the capital expenditure as on COD to ₹ 2845.82 lakh after deducting ₹ 74.84 lakh towards excess spares. Subsequently, the said asset was included in Petition No. 56/TT/2011 as Asset 4 and combined with Asset 5 for grant of tariff w.e.f. 1.4.2011.
(d) The Commission vide order dated 30.4.2013 in Petition No 56/TT/2011, had approved tariff for five assets, which were numbered as Asset-B1 to B5 in the instant petition. The Commission in order dated 30.4.2013 has approved tariff on basis of notional COD (1.4.2011) by combining the AssetB2 and B3 and Asset-B4 and B5. As mentioned above, the asset which was earlier covered in Petition No. 336/TT/2011 (i.e. Asset A1 in the instant petition) was included in Petition No. 56/TT/2011 as asset Asset IV and it was combined with Asset V for grant of tariff w.e.f. notional COD (i.e. 1.4.2011). As per para 8 of order dated 30.4.2013 in Petition No. 56/TT/2011, the tariff approved for Asset IV had superseded the tariff approved for the single asset (i.e. Asset A1 in the instant petition) which was covered under Petition No. 336/2010 for 2009-14 period w.e.f. 1.4.2011. The Asset IV and Asset V covered in Petition No. 56/TT/2011 are termed as Asset B4 and Asset B5 in the instant petition. The clubbing of assets based on notional COD as carried out in final tariff orders has been
retained in the instant true up petition for determination of tariff from COD to 31.3.2014.
(e) The Commission vide order dated 1.8.2013 in Petition No 109/TT/2012, had approved tariff for 2 nos. of assets (Asset-1 and 2) which has been named as Asset C1 and Asset C2 in the instant true up petition. In order dated 1.8.2013, Commission had disallowed $50 \%$ on IDC and IEDC for 8 months in both the assets and further disallowed 100\% IDC and IEDC for 3 months and 5 months in case of Asset-1 and Asset-2 respectively. Aggrieved by the order dated 1.8.2013, the petitioner filed Appeal No. 257 of 2013 before the Appellate Tribunal for Electricity (APTEL). The APTEL vide order dated 12.9.2014 in Appeal No. 257 of 2013 had directed to allow IDC and IEDC for delay of 8 months in both assets and retained the disallowance of IDC and IEDC for 3 months and 5 months for Asset 1 and 2 respectively. Subsequently, Commission vide order dated 17.8.2015 in Petition No. 109/TT/2012 had revised the tariff computation of both assets to incorporate the APTEL's judgment dated 12.9.2014 by disallowing the IDC and IEDC for 3 months (₹2.90 lakh) and 5 months (₹9.94 lakh) in case of Asset-1 and Asset-2 respectively.
(f) The Commission vide order dated 28.5.2012 in Petition No 136/TT/2011, had approved tariff for single asset (which is mentioned as Asset-D in the instant petition) based on the admitted cost as on 1.7.2011 (COD) as ₹2333.45 lakh after restricting the IDC and IEDC for the period of time over-
run of 8 months and excess spares of amount ₹29.87 lakh and allowed add cap is ₹227.87 lakh for 2011-12. Further ₹2486.10 lakh as capital expenditure was considered after restricting ₹75.22 lakh.
(g) As per the investment approval dated 25.2.2008, the transmission assets covered in WRSSS VI were scheduled to be commissioned in 33 months, i.e. 1.12.2010. The details of the period of time over-run condoned by the Commission in case of the instant assets, covered in different petitions, are summarized below:-

## Cost over-run

10. The completion cost as per Auditor certificate is within the allocated FR cost for all individual assets. Hence, there is no cost over-run in case of individual assets.
11. MPPMCL has submitted that the extension work was planned in already levelled area of existing switchyard at 400/220 kV Raipur Sub-station. However, during the detailed engineering and finalization of working drawing it was found that ICT and its 400 kV can be accommodated in existing levelled area but 220 kV bays for ICT and associated 2 number of lines could not be placed in it and additional area was required. Further, there was a level difference of 4 mtrs . with respect to existing level and nearby area. Accordingly, additional work of levelling and preparation of 220 kV area involving 35697.55 mtrs. cutting and filling along with associated road and drain in it was added as per actual requirement. MPPMCL has submitted that the petitioner's preliminary survey was faulty and the additional expenditure due to such faulty planning is will purely attributable to the petitioner. Hence, the claim should be disallowed.
12. In response, the petitioner has submitted that ICT-III and its 400 kV bay are installed in existing earlier levelled area whereas, adjacent area was levelled for 220 kV bays, which was not originally envisaged in FR. Due to this additional area, 4.2 km of MS rod for earth mat increased, causing increase in cost under this head. It was further submitted that the Commission in Petition No. 136/TT/2011 in order dated 28.5.2012 has admitted the capital cost as claimed. The petitioner requested to allow the completion cost as claimed in the instant petition. We have considered the
submissions of MPPMCL and the petitioner. The capital cost of the instant assets already admitted by the Commission while granting final tariff for the 2009-14 tariff period is considered for truing up of the cost of the 2009-14 tariff period in this order.

## Interest During Construction (IDC)

13. The allowable IDC has been worked out considering the information submitted by the petitioner and has been worked out for the individual assets separately on cash basis after considering the time over-run period which has been not condoned by Commission. The loan details submitted in Form-13 for period 2009-14 and the IDC computation sheet were also considered for the purpose of IDC calculation on cash and accrued basis. As stated earlier, Asset A1 of Petition No. 336/TT/2010 was merged with Asset 4 in Petition No. 56/TT/2011 (i.e. Asset B4 in the instant petition). Therefore, the IDC statement sheet of Asset-B4 has been considered for the computation of IDC of Asset A1. The asset wise IDC claimed by the petitioner and allowable IDC as on COD worked out are summarized hereunder:-

## Incidental Expenditure during Construction (IEDC)

14. The allowable IEDC has been worked out considering the percentage of IEDC on Hard Cost as indicated in the Abstract Cost Estimate as per original investment approval i.e. $10.75 \%$. Thus, the IEDC claimed is within this limit in case of all the individual assets. The details of the IEDC claimed by the petitioner and allowed are as follows:-

## Liquidated Damages (LD) adjustment

15. The petitioner was directed to submit the details of disallowed IDC and IEDC added back to the capital cost. The petitioner, vide affidavit dated 9.12.2016, has submitted the following asset wise details of LD recovered from the contractors and has stated that these amounts were adjusted in the capital cost of the respective asset. The petitioner has further submitted that

IDC and IEDC disallowed in Petition No. 109/TT/2012 and the assets covered in Petition No. 136/TT/2011 are added back to the capital cost.
(₹ in lakh)

| Asset C2 | 2.90 | 38.62 | 2.90 |

16. It is observed that the information submitted by the petitioner vide affidavits dated 9.12.2016 and 9.6.2017 are not matching. Moreover, the Auditor Certificate is silent about the LD adjustment. Therefore, no further adjustment has been carried out because of inconsistency in petitioner's submission and the Auditor certificate is silent on this issue. The issue of deviation will be taken up at the time of true up of tariff of 2014-19 period.

## Treatment of initial spares

17. Regulation 13 of the 2014 Tariff Regulations specifies ceiling norms for capitalization of initial spares in respect of transmission system as under:-

## "13. Initial Spares

Initial spares shall be capitalised as a percentage of the Plant and Machinery cost upto cut-off date, subject to following ceiling norms:
(d) Transmission system
(i) Transmission line - 1.00\%
(ii) Transmission Sub-station (Green Field) - 4.00\%
(iii) Transmission Sub-station (Brown Field) - 6.00\%
(iv) Series Compensation devices and HVDC Station-4.00\%
(i) Gas Insulated Sub-station (GIS)-5.00\%
(vi) Communication system-3.5\%

Provided that:
(i) where the benchmark norms for initial spares have been published as part of the benchmark norms for capital cost by the Commission, such norms shall apply to the exclusion of the norms specified above:
(ii) where the generating station has any transmission equipment forming part of the generation project, the ceiling norm for initial spares for such equipments shall be as per the ceiling norms specified for transmission system under these regulations:
(iii) Once the transmission project is commissioned, the cost of initial spares shall be restricted on the basis of plant and machinery cost corresponding to the transmission project at the time of truing up:
(iv) for the purpose of computing the cost of initial spares, plant and machinery cost shall be considered as project cost as on cut-off date excluding IDC, IEDC, Land Cost and cost of civil works. The transmission licensee shall submit the break up of head wise IDC \& IEDC in its tariff application."
18. The details of the Initial Spares pertaining to sub-station claimed by the petitioner and allowable as per the above said regulation are as follows:-
(₹ in lakh)

| Particulars | Capital cost claimed as on "cut-off" date i.e. 31.3.2014 | Initial spares claimed | Ceiling limit as per 2009 Tariff Regulations | Allowable initial spares | Excess initial spares claimed |

*Asset A1 and Asset B4 refers to same asset
19. MPPMCL has submitted that initial spares may be allowed as per the norms specified in the 2009 Tariff Regulations. In response, the petitioner has submitted that the excess amount of initial spares has been deducted from the
capital cost of the asset under Petition No. 136/TT/2011 vide order dated 28.5.2012. However, in Petition No. 33/TT/2013, the Commission vide order dated 25.4.2013, allowed initial spares considering the ceiling limit of Project as a whole instead of applying element wise. The petitioner has further submitted that after clubbing of assets for the purpose of tariff of the Project as whole, individual elements have lost their identity and therefore restricting of initial spares on individual elements becomes infructuous.
20. We have considered the submissions of MPPMCL and the petitioner. Initial spares are allowed for the instant as per the norms specified in the 2014 Tariff Regulations on the basis of the capital cost of the individual assets.

22. Clause (1) of Regulation 9 of the 2009 Tariff Regulations provides as under:-
"Additional Capitalisation: (1) The capital expenditure incurred or projected to be incurred, on the following counts within the original scope of work, after the date of commercial operation and up to the cut-off date may be admitted by the Commission, subject to prudence check:
(i) Undischarged liabilities;
(ii) Works deferred for execution;
(iii) Procurement of initial capital spares within the original scope of work, subject to the provisions of Regulation 8;
(iv) Liabilities to meet award of arbitration or for compliance of the order or decree of a court; and
(v) Change in Law:"
23. The "cut-off" date for Asset A1/B4 is 31.3.2013, for Asset B1, B2, B3, B5
$C 1$ and $D$ is 31.3.2014. The "cut-off" date for Asset $C 2$ is 31.3.2015.

25. In addition to the above, the petitioner also claimed the following IDC discharged as Additional Capital Expenditure under Regulation 19(1)(i) of the 2014 Tariff Regulations:-
(₹ in lakh)

| Asset | $\mathbf{2 0 1 0 - 1 1}$ | $\mathbf{2 0 1 1 - 1 2}$ | $\mathbf{2 0 1 2 - 1 3}$ | $\mathbf{2 0 1 3 - 1 4}$ |

26. The petitioner vide Form 9 has claimed ACE by adding the ACE given in the Auditor certificate and the IDC discharged under Regulation 9(1)(i) of the 2009 Tariff Regulations which refers to un-discharged liabilities prior to "cut-off" date. As per Form 9A submitted, vide affidavit dated 9.6.2017, the petitioner had increased the Gross Block (i.e. fresh capitalization) even after COD for all the assets except for Asset C2. But, the petitioner has claimed entire Additional Capital Expenditure under Regulation 9(1)(i) of the 2009 Tariff Regulations which refers to un-discharged liabilities pertaining to the already capitalized amount (i.e. Gross block as on COD). Since the Auditor certificate does not clarify the Gross Block capitalized as on COD, it is difficult to identify whether the ACE claimed is towards liability or fresh capitalization. However, the capital cost claimed as per Auditor certificate has been allowed up to "cut-off" date for all the assets for the 2009-14 period.
27. The petitioner vide Auditor certificate has claimed ACE amounting ₹164.61 lakh during 2013-14 and the same has been claimed in Form 9 under Regulation 9(1)(i) of the 2009 Tariff Regulations. As per Form 9A for Asset B4, submitted vide affidavit dated 9.6.2017, it is observed that the the ACE claim of ₹164.61 lakh for the year 2013-14 consist of ₹91.12 lakh towards discharge of liability and ₹73.49 lakh towards fresh capitalization. The discharge of liability is pertaining to the COD cost, hence, the same has been allowed. However, the fresh capitalization of ₹73.49 lakh after the "cut-off" date (i.e. 31.3.2013) has been not allowed as the petitioner had made the wrong claim under Regulation 9(1)(i) of the 2009 Tariff Regulations under discharge of liability. Accordingly, ₹73.49 lakh pertaining to Asset B4 for the year 2013-14 has been not considered for the purpose of tariff.
28. In addition to the above, the liability pertaining to IDC has been allowed as additional capitalization in the concerned financial year to the extent it has been actually discharged out of allowable IDC as on COD as determined in above paragraphs. The following liability discharged has been considered as Additional Capital Expenditure under Regulation 9(1)(i) of the 2009 Tariff Regulations:-

## Interest on Loan ("IOL")

38. Regulation 16 of the 2009 Tariff regulations provides that,-
"16. (1) The loans arrived at in the manner indicated in regulation 12 shall be considered as gross normative loan for calculation of interest on loan.

Order in Petition No. 47/TT/2017
(2) The normative loan outstanding as on 1.4.2009 shall be worked out by deducting the cumulative repayment as admitted by the Commission up to 31.3.2009 from the gross normative loan.
(3) The repayment for the year of the tariff period 2009-14 shall be deemed to be equal to the depreciation allowed for that year:
(4) Notwithstanding any moratorium period availed by the generating company or the transmission licensee, as the case may be the repayment of loan shall be considered from the first year of commercial operation of the project and shall be equal to the annual depreciation allowed,.
(5) The rate of interest shall be the weighted average rate of interest calculated on the basis of the actual loan portfolio at the beginning of each year applicable to the project:

Provided that if there is no actual loan for a particular year but normative loan is still outstanding, the last available weighted average rate of interest shall be considered:

Provided further that if the generating station or the transmission system, as the case may be, does not have actual loan, then the weighted average rate of interest of the generating company or the transmission licensee as a whole shall be considered.
(6) The interest on loan shall be calculated on the normative average loan of the year by applying the weighted average rate of interest.
(7) The generating company or the transmission licensee, as the case may be, shall make every effort to re-finance the loan as long as it results in net savings on interest and in that event the costs associated with such re-financing shall be borne by the beneficiaries and the net savings shall be shared between the beneficiaries and the generating company or the transmission licensee, as the case may be, in the ratio of 2:1.
(8) The changes to the terms and conditions of the loans shall be reflected from the date of such re-financing.
(9) In case of dispute, any of the parties may make an application in accordance with the Central Electricity Regulatory Commission (Conduct of Business) Regulations, 1999, as amended from time to time, including statutory reenactment thereof for settlement of the dispute:

Provided that the beneficiary or the transmission customers shall not withhold any payment on account of the interest claimed by the generating company or the transmission licensee during the pendency of any dispute arising out of refinancing of loan."
39. The petitioner has claimed the IOL based on actual interest rates for each year during the 2009-14 period. We have considered the submissions of the petitioner and accordingly calculated the IOL based on actual interest rate, in accordance with Regulation 16 of the 2009 Tariff Regulations.
40. In the calculations, the interest on loan has been worked out as detailed below:-
(i) Gross amount of loan, repayment of instalments and rate of interest and weighted average rate of interest on actual average loan have been considered as per the petition;
(ii) The repayment for the tariff period 2009-14 has been considered to be equal to the depreciation allowed for that period.
41. The details of weighted average rate of interest are given in Annexure-I to Annexure-VIII. The IOL allowed under Regulation 16 of the 2009 Tariff Regulations is as follows:-

## DETERMINATION OF ANNUAL TRANSMISSION CHARGES FOR 2014-19

49. The true-up tariff for the instant transmission system up to 2009-14 tariff period has been granted based on the actual COD of individual elements irrespective of the fact that the project as whole is completed or not. This leads to granting of multiple tariffs for the assets covered under the single project/transmission system. The Commission, vide Regulation 6 of the 2014 Tariff Regulations has brought in the concept of a single consolidated petition to be submitted by a petitioner which provide that in case all the elements of a transmission system have been declared under commercial operation prior to 1.4.2014, then a single tariff can be granted for all the assets covered under such a single project/transmission system. However, to determine a single transmission tariff for different assets after combining them, as per the 2014 Tariff Regulations, the concept of effective date of commercial operation and weighted average life has also been introduced in Regulation 27 (Depreciation) of the 2014 Tariff Regulations. The relevant portions of Regulation 6 of the 2014 Tariff Regulations are as follows:-

## "6. Tariff determination

(1) Tariff in respect of a generating station may be determined for the whole of the generating station or stage or generating unit or block thereof, and tariff in respect of a transmission system may be determined for the whole of the transmission system or transmission line or sub-station or communication system forming part of transmission system:
Provided that:
(i) where all the generating units of a stage of a generating station or all elements of a transmission system have been declared under commercial operation prior to 1.4.2014, the generating company or the transmission licensee, as the case may be, shall file consolidated petition in respect of the entire generating station or transmissions system for the purpose of determination of tariff for the period 2014-15 to 2018-19:
50. The instant petition relates to the transmission system associated with WRSS XI Scheme-VI in Western Region. The petitioner in the instant petition has claimed single tariff for 2014-19 period on consolidated capital cost of all the asset commissioned till 31.3.2014. The Commission had granted final tariff from COD to 31.3.2014 for these assets vide orders dated 21.7.2011 in Petition No. 336/TT/2010, 30.4.2013 in Petition No. 56/TT/2011, 17.8.2015 in Petition No. 109/TT/2012 and 28.5.2012 in Petition No. 136/TT/2011. The true up of tariff of these assets for 2009-14 period has been carried out separately in the preceding paras. The consolidation of assets of the project has been allowed and the tariff for 2014-19 period has been worked out based on the methodology and assumptions mentioned as under:-
a. Commission in order dated 29.2.2016 in Petition No. 181/TT/2014 approved the methodology of combining individual assets at the time of filing truing up petition along with 2014 tariff. The same methodology has been adopted in the instant case.
b. The consolidation of individual assets for single tariff has been done by adding up of the admitted capital cost as on 31.3.2016 of individual assets. The AFC for the consolidated cost has been worked out as given below.
i. Return on Equity: The admitted Gross Normative Equity as on
31.3.2014 of individual assets are added to arrive the Gross Equity as on 1.4.2014 for the combined assets.
ii. Interest on Loan: The admitted Gross Normative Loan and cumulative repayment of loan as on 31.3.2014 of individual assets are added to get the Gross Normative Loan and cumulative repayment of loan as on 1.4.2014 for the combined assets.
iii.Depreciation: The admitted gross capital cost and cumulative depreciation as on 31.3.2014 of individual assets are added to get the gross capital cost and cumulative depreciation as on 1.4.2014 for the combined assets. Lapsed life of the combined assets as on 1.4.2014 has been worked out by the concept of Effective COD and Weighted Average Life as provided in Regulation 27 of 2014 Tariff Regulation.
iv.Interest on Working Capital: Since, the normative Working capital is derived from the O\&M Expenses and Receivables; it is being worked out accordingly.
v.O\&M Expenses: The entitled O\&M Expenses as per 2014 tariff regulation of individual assets are added and considered as O\&M Expenses of the consolidated assets.
51. It is to be noted that, though the consolidation is being done for single tariff, the petitioner has to maintain the identity of the individual assets. In future
tariff petitions, the petitioner has to maintain and provide the details of individual assets like asset description, actual COD, cut-off date, effective COD, admitted capital cost, O\&M Expenses claim etc. The petitioner has to make all the future claim of additional capital expenditure or de-capitalization for the project, along with auditor certificate by clearly mentioning the individual assets to which the claim has been made. Accordingly, the petitioner should submit the individual asset wise details in form 4, 4A, 4B, 7, 7A, 10B and 13. The admissibility of ACE claim shall be reviewed at individual asset level and the total admitted ACE of the individual asset shall be considered as the admitted ACE of the project as whole.
52. The scope of WRSS-VI includes nine assets and these nine assets are combined into a single asset and single tariff for the project as a whole has to be worked out for the 2014-19 tariff period. Thus, all the assets in the instant petition have been combined into a single asset for the purpose of single tariff for 201419 period. For the purpose of calculation of single tariff, the Effective COD and Weighted Average life of the project as a whole has been computed as discussed in the paragraphs pertaining to depreciation in this order.
53. The cumulative depreciation for the project as whole has been computed as shown below:-

| Particulars | Details of cumulative <br> depreciation as on 31.3.2014, <br> as determined during true-up <br> of 2009-14 tariff | Considered for single <br> tariff for the project as <br> whole as on 1.4.2014 |

58. The capital cost as on 1.4 .2014 as certified by the Auditor is ₹ 25164.76 lakh. However, the petitioner in form 10A has claimed capital as on 1.4.2014 amounting ₹25161.85 lakh for tariff purpose. The capital cost as on 31.3.2014 of individual assets were trued up in above paragraphs. Based on the true up, the element wise capital cost (i.e. Land, Building, Transmission
line, Sub-station and PLCC) as admitted on 31.3.2014 for all assets are clubbed together and the combined cost has been considered as capital cost of the project as a whole as on 1.4.2014. Thus, ₹24531.36 lakh has been considered as the admitted capital cost of the project as on 1.4.2014 as per details as follows:-

60. The "cut-off" date for Asset $\mathrm{A} 1 / \mathrm{B} 4$ is 31.3 .2013 and for Asset $\mathrm{B} 1, \mathrm{~B} 2, \mathrm{~B} 3$, B5, C1 and D is 31.3.2014. The "cut-off" date for Asset C2 is 31.3.2015. The asset wise additional capital expenditure (ACE) claimed as per Auditor certificate has been shown as under:-
(₹ in lakh)

| Asset | Additional Capital <br> Expenditure claimed |  |

| Asset-D | 34.40 | 0.00 |
| Total | $\mathbf{5 0 0 . 6 0}$ | $\mathbf{4 9 . 0 1}$ |

61. The petitioner has claimed ACE for Asset B1, B2, B3, B4, C2 and D. No ACE has been claimed for Asset B5 and C1. Further, the petitioner, vide affidavit dated 9.6.2017, has submitted revised Form 7 which shows that the ACE has been claimed under Regulation 14(2)(iv) of the 2014 Tariff Regulations. The
details of ACE claimed has been summarized below:-

| Particulars | $\mathbf{2 0 1 4 - 1 5}$ | $\mathbf{2 0 1 5 - 1 6}$ | $\mathbf{2 0 1 6 - 1 7}$ | 2017-18 | 2018-19 |

| Regulation 14(2) (iv) | 500.60 | 49.01 | 0.00 | 0.00 | 0.00 |

62. The petitioner vide Form 7 has made the above claim under Regulation 14 (2)(iv) of the 2014 Tariff Regulations which deals with any liability for works executed prior to the "cut-off" date, after prudence check of the details of such undischarged liability, total estimated cost of package, reasons for such withholding of payment and release of such payments etc.
63. The petitioner has not submitted the Form 4A, instead provided the required information vide affidavit dated 9.6.2017 through Form 9A of the 2014 Tariff Regulation for the year 2014-15 and 2015-16. It is observed from the details provided in Form 9A that the petitioner had increased the Gross Block (i.e. fresh capitalization) even after COD for all the assets except for Asset C2 as summarised below. Therefore, the claim of ACE for 2014-15 and 2015-16 has been segregated as under:-
(₹ in lakh)

| Particulars | $2014-15$ |  |  |  |
| :--- | ---: | ---: | ---: | :---: |

| Total | $\mathbf{4 9 . 0 1}$ | $\mathbf{0 . 0 0}$ | $\mathbf{4 9 . 0 1}$ |  |

64. Accordingly, the ACE claimed for 2014-15 for the asset B1, B2, B3 B4 and D are not pertaining to the discharge of liability as claimed by the petitioner. Instead these claims are the expenditure incurred for fresh capitalisation and these fresh capitalisation are incurred after "cut-off" date. Therefore, the ACE claimed for Asset B1, B2, B3, B4 and D for the year 2014-15 amounting ₹465.30 lakh are disallowed. However, the petitioner is given the liberty to submit the details at the time of true up with proper justification and proper regulation. The admissibility shall be reviewed at the time of true up. In case of Asset C2, the entire claim for the year 2014-15 and 2015-16 are identified as the discharge of liability. Hence, the amount of ₹35.30 lakh for the year 2014-15 has been admitted under Regulation 14(1)(i) and ₹49.01 lakh has been admitted under Regulation 14(2)(iv). Therefore, the additional capitalization allowed for 2014-19 tariff period in the respective financial year is as under:-

## (₹ in lakh)

## Debt:Equity Ratio

67. Clause 3 of Regulation 19 of the 2014 Tariff Regulations specifies as under:-
"(3) In case of the generating station and the transmission system declared under commercial operation prior to 1.4.2014, debt-equity ratio allowed by the Commission for determination of tariff for the period ending 31.3.2014 shall be considered."
68. The petitioner has considered debt:equity ratio of $70: 30$ as on 31.3.2014 for the combined assets. The admitted debt:equity ratio of 70:30 after true-up for the tariff period ending 31.3.2014 has been considered as opening debt:equity ratio as on 1.4.2014. For additional capitalization, the petitioner has proposed normative debt:equity ratio of $70: 30$ and the same has been considered. The details of the debt:equity as on 1.4.2014 considered for the purpose of determination of tariff for the 2014-19 tariff period and as on 31.3.2019 are as follows:-

## Return on Equity ("RoE")

69. Clause (1) \& (2) of Regulation 24 and Clause (2) and (3) of Regulation 25 of the 2014 Tariff Regulations specify as under:-

## "24. Return on Equity:

(1) Return on equity shall be computed in rupee terms, on the equity base determined in accordance with regulation 19.
(2) Return on equity shall be computed at the base rate of $15.50 \%$ for thermal generating stations, transmission system including communication system"
"25. Tax on Return on Equity:
(2) Rate of return on equity shall be rounded off to three decimal places and shall be computed as per the formula given below:

Rate of pre-tax return on equity = Base rate / (1-t)
Where " t " is the effective tax rate in accordance with Clause (1) of this regulation and shall be calculated at the beginning of every financial year based on the estimated profit and tax to be paid estimated in line with the provisions of the relevant Finance Act applicable for that financial year to the company on pro-rata basis by excluding the income of non-generation or non-transmission business, as the case may be, and the corresponding tax thereon. In case of generating company or transmission licensee paying Minimum Alternate Tax (MAT), "t" shall be considered as MAT rate including surcharge and cess.
xxxx
(2) The generating company or the transmission licensee, as the case may be, shall true up the grossed up rate of return on equity at the end of every financial year based on actual tax paid together with any additional tax demand including interest thereon, duly adjusted for any refund of tax including interest received from the income tax authorities pertaining to the tariff period 2014-15 to 2018-19 on actual gross income of any financial year. However, penalty, if any, arising on account of delay in deposit or short deposit of tax amount shall not be claimed by the generating company or the transmission licensee as the case may be. Any under-recovery or over-recovery of grossed up rate on return on equity after truing up, shall be recovered or refunded to beneficiaries or the long term transmission customers/DICs as the case may be on year to year basis."
70. The RoE has been worked out in accordance with Regulations 24 and 25 of the 2014 Tariff Regulations. The rate of pre-tax return on equity for all the financial year during 2014-19 period has been determined by grossing up the base rate of $15.50 \%$ with effective tax rate of $20.961 \%$ (i.e. MAT rate applicable for the financial year 2013-14). This rate of pre-tax return on equity is subject to true up based on the effective tax rate of respective financial year applicable to the petitioner company.
71. Accordingly, the ROE determined is as given under:-
(₹ in lakh)

(6) The interest on loan shall be calculated on the normative average loan of the year by applying the weighted average rate of interest."
73. In the calculations, the interest on loan has been worked out as detailed below:
(i) It is pertinent to mention that the actual loan portfolio of individual assets as considered for the true up purpose has been added together for the balance as on 1.4.2014 is not matching with the balance
mentioned in Form 9C. The loan portfolio as submitted by the petitioner has been considered for determining WAROI. Therefore, petitioner is directed to submit the revised Form 9C by tallying the loan wise balance of individual assets as considered as part of true up purpose at the time of true up of 2014-19.
(ii) The gross amount of loan, repayment of instalments and rate of interest on actual loans as mentioned in Form 9C have been considered which is subject to true up.
(iii) The yearly repayment for the tariff period 2014-19 has been considered to be equal to the depreciation allowed for that year.
(iv) Weighted average rate of interest on actual average loan worked out as per (i) above is applied on the normative average loan during the year to arrive at the interest on loan.
74. The details of weighted average rate of interest are placed at Annexure-IV and the IOL has been worked out as follows:-

Order in Petition No. 47/TT/2017

## Depreciation

## 75. Clause (2), (5) and (6) of Regulation 27 of the 2014 Tariff Regulations

 provide as follows:-
## "27. Depreciation:

(1) Depreciation shall be computed from the date of commercial operation of a generating station or unit thereof or a transmission system including communication system or element thereof. In case of the tariff of all the units of a generating station or all elements of a transmission system including communication system for which a single tariff needs to be determined, the depreciation shall be computed from the effective date of commercial operation of the generating station or the transmission system taking into consideration the depreciation of individual units or elements thereof.

Provided that effective date of commercial operation shall be worked out by considering the actual date of commercial operation and installed capacity of all the units of the generating station or capital cost of all elements of the transmission system, for which single tariff needs to be determined.
(2) The value base for the purpose of depreciation shall be the capital cost of the asset admitted by the Commission. In case of multiple units of a generating station or multiple elements of transmission system, weighted average life for the generating station of the transmission system shall be applied. Depreciation shall be chargeable from the first year of commercial operation. In case of commercial operation of the asset for part of the year, depreciation shall be charged on pro rata basis.
xxx
xxx
(5) Depreciation shall be calculated annually based on Straight Line Method and at rates specified in Appendix-II to these regulations for the assets of the generating station and transmission system:

Provided that the remaining depreciable value as on 31st March of the year closing after a period of 12 years from the effective date of commercial operation of the station shall be spread over the balance useful life of the assets.
xxx
xXX
(6) In case of the existing projects, the balance depreciable value as on 1.4.2014 shall be worked out by deducting the cumulative depreciation as admitted by the Commission upto 31.3.2014 from the gross depreciable value of the assets."

## Effective Date of Commercial Operation (E-COD)

76. The Effective Date of Commercial Operation (E-COD) for the project as a whole has been worked out based on the admitted capital cost of individual assets as on 31.3.2014 and the actual/notional COD of individual assets. Accordingly, the Effective Date of Commercial Operation (E-COD) for the combined assets has been worked out as shown below:-
(₹ in lakh)

| Computation of Effective COD |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Project Name | Asset No. | $\begin{array}{\|l\|} \hline \text { Actual } \\ \text { COD } \end{array}$ | Admitted Capital Cost as on 31.3.2014 | Weight of the cost | No. of days from last COD | Weight ed days | Effective COD (Latest COD Total Weighted days) |
| Western | B 1 | 1.3.11 | 9861.96 | 40.20\% | 306 | 123.02 | 30.4.2011 |
| Region | B 2\& B 3 | 1.4.11 | 3893.23 | 15.87\% | 275 | 43.64 |  |
| System | B 4\& B 5 | 1.4.11 | 5128.82 | 20.91\% | 275 | 57.49 |  |
| Strength ening SchemeVI | C 1 | 1.11.11 | 1696.20 | 6.91\% | 61 | 4.22 |  |
|  | C 2 | 1.1.12 | 1714.96 | 6.99\% | 0 | 0.00 |  |
|  | D | 1.7.11 | 2236.20 | 9.12\% | 184 | 16.77 |  |
|  | Total |  | 24531.36 | 100.00\% |  | 245.15 |  |

Thus, the E-COD has been used to determine the lapsed life of the project as whole, which works out as 2 year as on 1.4.2014. (i.e. the number of completed years as on 1.4.2014 from E-COD).

## Weighted Average Life (WAL)

77. The project as a whole has multiple elements (i.e. Land, Building, Transmission line, Substation and PLCC) and each element may have different span of life. Therefore, in the 2014 Tariff Regulations, the concept of Weighted Average Life (WAL) has been introduced which has been used as the useful life
of the project as whole. The Weighted Average Life (WAL) has been determined based on the admitted capital cost of individual elements as on 31.3.2014 and their respective life as stipulated in the 2014 Tariff Regulations. The element wise life as it was defined in Tariff Regulations prevailing at the time of actual COD of individual assets has been ignored for this purpose. The life as defined in the 2014 Tariff Regulations has been considered for determination of WAL. Accordingly, the WAL of the project as whole has been worked out as 26 years as follows:-
(₹ in lakh)

| Determination of Weighted Average Life of the Project |  |  |  |  |  |  |  |  |  |

Note: Asset A1- Tariff for Asset A1(stand alone) allowed upto 31.03.2011 and thereafter combined with Asset B 4.
Asset B 2- Tariff for Asset A1(stand alone) allowed upto 31.03.2011 and thereafter combined with Asset B 3 .
78. Further, it is assumed that, the WAL of the project as whole as on 1.4.2014 as determined above is applicable prospectively (i.e. for 2014-19 tariff period onwards) and no retrospective adjustment of depreciation in previous tariff period
is required. Accordingly, the WAL has been used to determine the remaining useful life as on 31.3.2014 as 24 years.
79. The admitted gross capital cost and cumulative depreciation as on 31.3.2014 of individual assets are added to get the gross capital cost and cumulative depreciation as on 1.4.2014 for the combined assets. Lapsed life of the combined assets as on 1.4.2014 has been worked out on the basis of Effective COD and Weighted Average life as provided in Regulation 27 of 2014 Tariff Regulations. Further, to determine a single transmission tariff for the instant transmission assets, the concept of effective date of commercial operation and weighted average life under as stipulated in Regulation 27 of 2014-19 Tariff Regulations has been considered.
80. We have considered the submission made by the petitioner with reference to depreciation. Depreciation is allowed as provided under Regulation 27 of the 2014 Tariff Regulations. The details of the depreciation allowed are given hereunder:-
