

PCKL Views on the Staff paper on Market Coupling

1. Presently, competition among the exchanges can be seen, Once the market coupling is done, exchanges are not taking any initiatives for innovative measures.
2. Exchanges are using well established software for the energy transactions, once the market coupling done by new agency, that has to develop entire the software for this purpose. There is a duplication on these transactions which will be additional burden to utilities.
3. The member of the exchanges are paying the exchange transactions charges and need to pay charges on new agency for Market coupling which will be additional burden on consumers, also in tariff.
